One team. One visual language.

BYU-I FORMULA RACING

A practical identity system for the website, sponsorship booklet and everyday team materials.

COMPACT MARK

PRIMARY CREST

HEADINGS BARLOW CONDENSED SEMIBOLD

BODY INTER REGULAR + SEMIBOLD

MIDNIGHT	RACING BLUE	COOL SILVER	PAPER	ACTION BLUE
#031F3D	#0084FF	#E5E7EB	#F5F7FA	#005EB8

Use exact values. Give every color a job.

These are proposed team colors normalized from the selected concepts, not a claim of university approval.

Midnight

#031F3D

RGB 3 / 31 / 61

Hero panels, logo holding areas

Racing Blue

#0084FF

RGB 0 / 132 / 255

Identity, large accents, key graphics

Cool Silver

#E5E7EB

RGB 229 / 231 / 235

Marks and text on navy

Paper

#F5F7FA

RGB 245 / 247 / 250

Long-form reading surfaces

READABLE PAIRINGS / NORMAL TEXT

Aa	White on Midnight	16.57:1	PASS
Aa	Silver on Midnight	13.38:1	PASS
Aa	White on Action Blue	6.38:1	PASS
Aa	Ink on Paper	13.26:1	PASS
Aa	White on Racing Blue	3.66:1	LARGE TEXT ONLY

SUPPORT TOKENS

Action Blue #005EB8
Buttons + links on light surfaces

Ink #152C44
Reading text on light surfaces

Muted #526579
Captions and secondary UI

White #FFFFFF
Paper + high-contrast text

Racing Blue on Midnight is 4.53:1; reserve it mainly for large accents. Use Action Blue for white button labels. Silver on white is only 1.24:1: keep silver off light-body text. [1]

Choose the mark for the space.

A visible-mark measurement excludes the empty navy canvas around the supplied artwork.

FULL CREST / PRIMARY

Large hero areas, booklet cover and team presentations.

SHIELD / COMPACT

Navigation, avatars, small decals and page footers.

CLEAR SPACE

Leave at least W / 8 on every side, where W is the visible mark width.

Full crest: 240 px / 64 mm minimum

Start at 240 CSS px on screen or 64 mm in print. If the subtitle is still too small, enlarge it or choose the shield.

Shield: 48 px / 12 mm minimum

Use it instead of shrinking the crest. A favicon needs a separately checked micro mark; do not force this detailed border into 16 px.

Use a navy holding area

Current assets are raster concepts with a navy ground. On a light layout, retain a clean navy panel instead of erasing the interior.

Protect the proportions

Do not stretch, outline again, add shadows, rotate, change the stripe order or place the crest over a busy photograph.

Racing character. Straightforward reading.

Use two supporting families. The lettering inside the logo remains artwork and should never be retyped.

BARLOW CONDENSED / SEMIBOLD / DISPLAY

ENGINEERED BY STUDENTS. BUILT TO COMPETE.

Inter keeps descriptions, technical data and sponsor requests clear. Use sentence case, normal letter spacing and short, specific paragraphs.

TYPE SCALE

Role	Website	Booklet
Hero heading	48-72 px	28-36 pt
Section heading	28-40 px	18-24 pt
Body copy	16-18 px	11-12 pt
Caption / metadata	14 px	9.5-10 pt

Body line height: 1.5-1.65. Keep lines around 50-75 characters. Use bold for short emphasis; save all caps for headings and labels.

GRAPHIC DEVICE

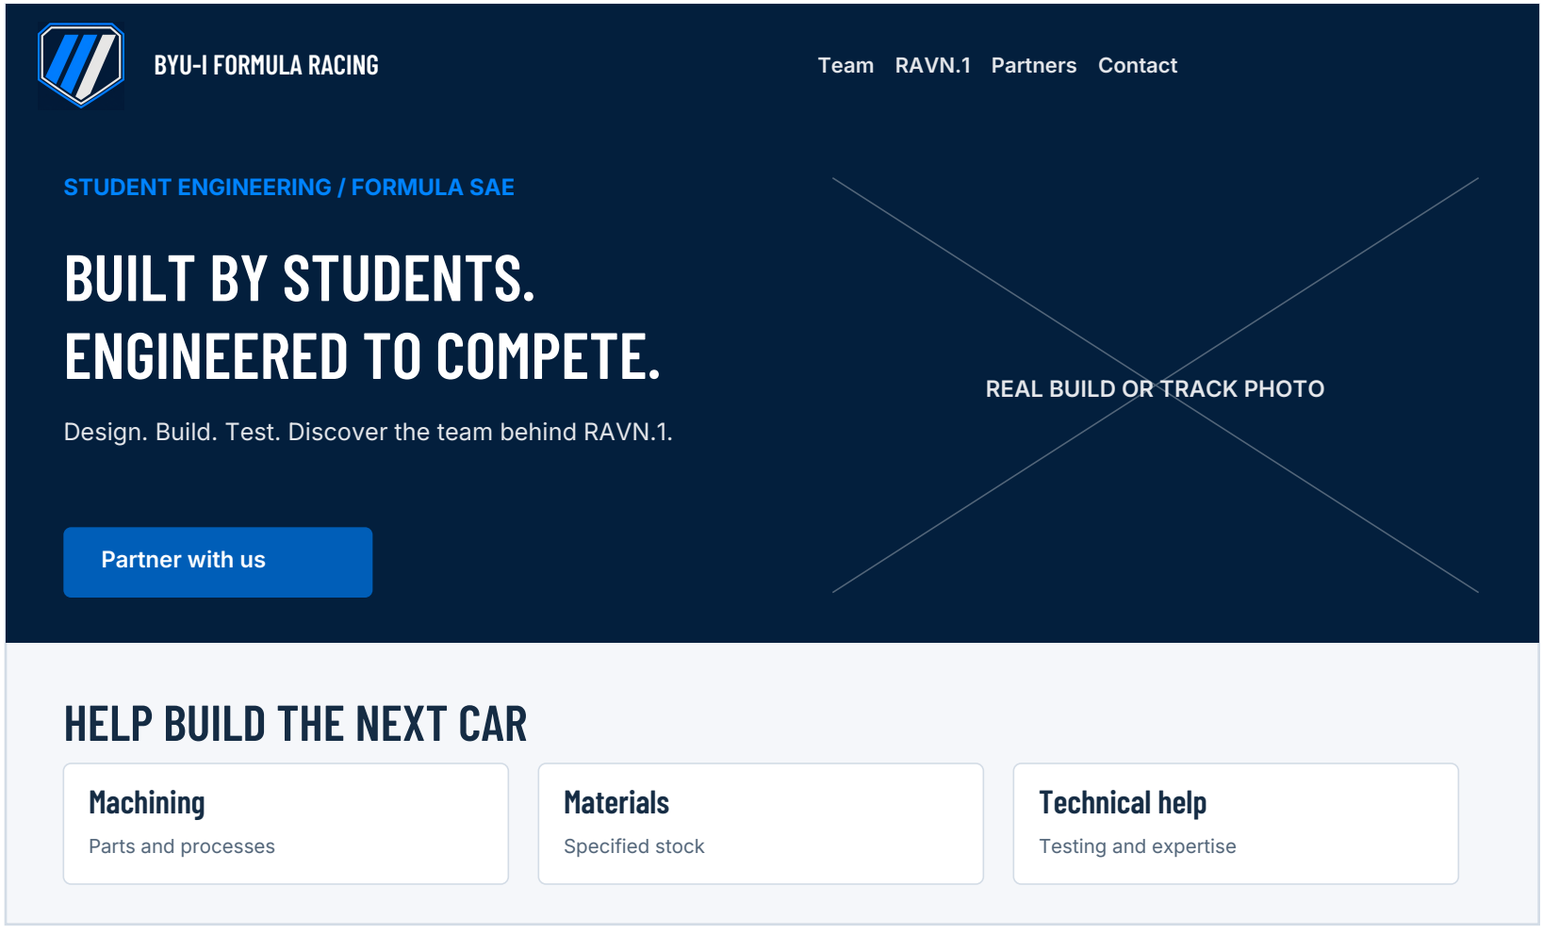

Use the three-bar rhythm once per page or major section. Two blue bars, then silver. Use a 25-degree forward slant from vertical; never skew paragraph text.

NORDIC_MODERN / SPECIAL USE

Keep the custom font for the RAVN.1 model identity or a short campaign accent. It is not the body font, UI font or a replacement for the crest wordmark.

A strong hero. A clean reading surface.

Layout example only. Crossed panels reserve space for real team photography; they are not stock or generated car images.

Navigation

Use the compact shield with live text. Team, RAVN.1, Partners, Updates and Contact are enough for the main menu.

Primary action

Use one clear "Partner with us" action. Explain how to contribute goods, services or technical assistance.

Page hierarchy

Hero first; then team, car, current needs, partners, updates and a direct contact path.

The crest belongs in a larger hero or team section. Do not squeeze the full crest into the navigation bar.

Build consistency into the components.

These values are encoded in the accompanying CSS tokens. Pixel values refer to CSS pixels, not image export resolution.

LAYOUT + RESPONSIVE SYSTEM

Content width	1,200 px maximum, centered
Desktop / 1,024 px+	12 columns; 48 px page inset
Tablet / 768-1,023 px	6 columns; 24 px page inset
Mobile / under 768 px	4 columns; 20 px page inset
Spacing	4, 8, 16, 24, 32, 48, 64, 96 px
Navigation / controls	72 px nav; controls at least 44 px high
Cards + buttons	8 px card radius; 4 px button radius

ACCESSIBILITY + BEHAVIOR

Contrast

At least 4.5:1 for normal text; 3:1 for large text. Use the page 2 pairings. Large means at least 24 px regular or about 18.7 px bold. [1]

Keyboard and motion

Every control needs a visible focus state. Include a skip link. Respect reduced-motion preferences and avoid autoplay backgrounds.

Touch and responsive type

Team rule: 44 x 44 px minimum targets. This is stronger than WCAG 2.2 AA's 24 px baseline with exceptions. Stack cards and open a keyboard-usable mobile menu. [2]

Content and images

Use live text, labeled form fields, descriptive link labels and meaningful photo alt text. Decorative stripes have empty alt text. Do not rely on color alone.

Make the request concrete and easy to answer.

Recommended eight-page structure. It supports goods, services and assistance instead of cash packages or dollar-based tiers.

01

Cover

Team name, primary crest, one real hero photo and a concise partnership invitation.

02

Who we are

Students, engineering mission and learning outcomes. Use only verified team facts.

03

Meet RAVN.1

One large car photo and a small set of confirmed specifications or clearly labeled targets.

04

How we build

Design, manufacture and test. Show actual students and the work partners help enable.

05

What we need

Requests with specification, quantity, need-by date, team owner and intended use.

06

Ways to help

Machining, materials, software, testing, mentoring and other useful in-kind assistance.

07

Partner value

Explain learning impact and suitable recognition. Group by contribution type, not cash value.

08

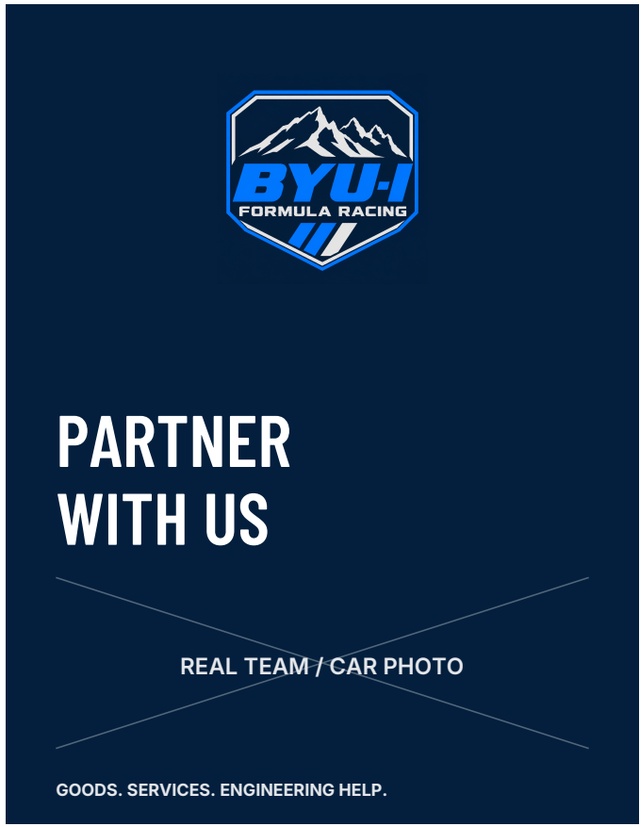

Next step

One named contact, verified email, website or QR code, and the specific response requested.

REQUEST FORMAT Item or service / specification / quantity / need-by date / team owner

Let photographs carry the story.

Illustrative cover and interior page at reduced size. Replace every placeholder with verified team content before publishing.

COVER / NAVY + LARGE CREST

INTERIOR / LIGHT + PHOTOGRAPHY

Cover

Use navy for impact and one clear invitation. Keep the crest visibly at least 64 mm wide in the real booklet.

Interior

Switch to white or Paper for reading and economical printing. Use one strong image rather than a collage of tiny photos.

Ask blocks

Keep every request in the same order. Add a realistic response path: who to contact and what information to send.

Print clearly. Ask specifically. Show real work.

Use a repeatable grid and one visual hierarchy across every page, regardless of which student edits the next revision.

PRINT + PAGE GEOMETRY

Format	US Letter portrait: 8.5 x 11 in
Content margins	0.625 in; keep critical content at least 0.5 in from trim
Grid	Two reading columns; 0.25 in gutter
Bleed	0.125 in only when required for edge-to-edge artwork
Photos	Aim for 300 ppi at final placement size
Text	11-12 pt body; 9.5-10 pt captions; never shrink to fit
Export	Embed fonts; keep text selectable; include working links

EDITORIAL + PARTNER RULES

Use real evidence

Show students, fabrication and testing. Publish measured results with units; distinguish design targets from achieved results. Do not invent sponsors, partner logos or statistics.

Write a useful invitation

Say what the team needs and why it matters. Prefer "Help machine our suspension components" over vague claims about prestige or exposure.

Keep recognition practical

Offer suitable acknowledgment, build updates or student engagement within school rules. Avoid implied endorsement or guarantees of marketing results.

Make the PDF usable

Add document headings, reading order, alt text and bookmarks in the source layout tool. Provide a tagged digital export and test links and QR codes.

Keep one source of truth.

Use this guide as a proposed working system; keep the selected logo direction and the technical rules together.

TEAM ASSET + CONTENT RULES

Name the identity consistently

Team: BYU-I Formula Racing. Vehicle model: RAVN.1. Institution in prose: BYU-Idaho. Use model marks separately from the team crest.

Keep original assets and versions

Store one primary crest, one compact shield and approved output copies. Use names such as byui-formula-crest-dark-v1.png; do not resave screenshots as masters.

Prepare production artwork deliberately

Current logo previews are raster concepts. At 300 ppi the visible crest supports about 79 mm width. Large signs, embroidery and one-color applications need suitable production masters.

Color management

Treat HEX values as screen targets. Convert print work with the printer's ICC profile and check a proof. Silver is a cool gray ink appearance, not metallic foil by default.

UNIVERSITY BRAND DISTINCTION

BYU-Idaho publishes Brand Blue #006EB6 (RGB 0 / 110 / 182; CMYK 89 / 55 / 1 / 0). The brighter #0084FF is a proposed racing concept color. The university requires approved colors and official logo usage. This guide does not establish approval for the custom crest. Confirm the final team mark and color system against campus branding before public rollout. [3, 4]
